

VAPT Questionnaire — Business

Document 1 of 2 • For a Super Admin / business owner • ~15 minutes

No technical background needed — your best guess is fine

No technical knowledge needed. Guesses are fine. Yellow boxes = your answer.

Screenshots of the Super Admin menu, the Android home/menu, and the iPhone home/menu are worth more than exact page counts.

Prefer a call? Write “please book a 20-minute screen-share” in 1.4 and skip the rest.

If you have a developer, please also send them Document 2 (Technical).

1. You

1.1	Organization, your name, role, email, phone	
1.2	Deadline for quote or test (if any)	Or “no rush”
1.3	What to include in this price	☐ Super Admin website ☐ Android app ☐ iPhone app ☐ Retest after fixes
1.4	What to leave out, or “please book a call instead”	e.g. marketing site, live system, third-party payment page
1.5	Roughly how many people use this system in total?	☐ Under 100 ☐ 100–1,000 ☐ 1,000–10,000 ☐ 10,000+ ☐ Not sure

2. Super Admin website — size

2.1	In one sentence: what is this portal for?	e.g. Staff manage users, orders and settings
2.2	Link (if you can share) + practice copy besides live?	https:// ☐ We have a UAT/copy ☐ Live only ☐ Not sure
2.3	List every menu item you can see (or write “see screenshot”)	Dashboard, Users, Roles, Billing, Reports, Settings...
2.4	Types of people who log in (name them)	e.g. Super Admin, Admin, Finance, Viewer Count: ☐ 1-2 ☐ 3-5 ☐ 6+
2.5	One company, or many companies/branches in the same portal?	☐ Only us ☐ Many companies inside one portal ☐ Not sure
2.6	Second step at login (OTP / app / email code)? Company Google/Microsoft login?	☐ OTP/MFA ☐ Company SSO ☐ Password only ☐ Not sure

Tick the closest size. Count unique screens (list + add + edit = 3). Do not count Privacy pages. 50 customers with the same profile = 1 screen.

Tick one →	Small	Typical	Large
Super Admin	Up to 15 screens, simple forms	16–60 screens, a few user types	60+ screens, or money / files / many companies

What a Super Admin actually did yesterday (5 bullets). This catches work the ticks miss.

e.g. add staff → reset password → approve request → refund → download report → change a setting

3. Super Admin — what changes the price (tick all Yes)

3.1	Different access per person — some people see more menus than others	☐ Yes ☐ No ☐ Not sure
3.2	Create / approve / reject work — someone must say yes before a change	☐ Yes ☐ No ☐ Not sure
3.3	Upload or download files / Excel — documents, IDs, bulk import or export	☐ Yes ☐ No ☐ Not sure
3.4	Money (pay, refund, invoice, wallet) — any fees, payouts or payment gateway	☐ Yes ☐ No ☐ Not sure
3.5	“Login as” another user — Super Admin can see the system as someone else	☐ Yes ☐ No ☐ Not sure
3.6	Connected to other tools — WhatsApp, SMS, payments, KYC, GST, CRM	How many? ____ ☐ Yes ☐ No ☐ Not sure

4. Android app (fill even if iPhone is similar)

If Android is not in this quote, write N/A in 4.1 and skip to section 5.

4.1	Android app name + Play Store link (or “not published”)	
4.2	Who is this Android app for? How do they sign in?	☐ Customer ☐ Staff ☐ Both ☐ Partners Login: ☐ OTP ☐ Password ☐ Fingerprint
4.3	Types of user in the Android app	e.g. customer, driver, staff — or “only one type”
4.4	Same system behind this app as Super Admin?	☐ Yes ☐ Partly ☐ Separate Android backend ☐ Not sure
4.5	Can you later give us the Android file (APK) for testing?	☐ Yes ☐ Not sure — we will ask our developer

Count unique Android screens (bottom bar + menu + forms). List + add + edit = 3 screens.

Tick one →	Small	Typical	Large
Android size	Up to 15 screens	16–40 screens	40+ screens, or pay / KYC / chat / maps

Android user journey — tap icon to finishing the main job.

e.g. open → OTP → home → search → details → pay → receipt

Android — tick all Yes (do not copy iPhone answers; they can differ).

	Pay / wallet / subscriptions — cards, UPI, Play Billing, points	☐ Yes ☐ No ☐ Not sure
	KYC / camera / ID photos — document capture or liveness	☐ Yes ☐ No ☐ Not sure
	Chat or in-app messages — support or user-to-user	☐ Yes ☐ No ☐ Not sure
	Maps or live location — tracking people or places	☐ Yes ☐ No ☐ Not sure
	Works partly offline / data on phone — some info on aeroplane mode	☐ Yes ☐ No ☐ Not sure
	Notifications / QR / other heavy feature — name it if Yes	☐ Yes ☐ No ☐ Not sure

5. iPhone / iOS app (fill separately — do not write “same as Android”)

If iPhone is not in this quote, write N/A in 5.1 and skip to section 6.

5.1	iPhone app name + App Store link (or TestFlight / not published)	
5.2	Who is this iPhone app for? How do they sign in?	☐ Customer ☐ Staff ☐ Both ☐ Partners Login: ☐ OTP ☐ Password ☐ Face ID
5.3	Types of user in the iPhone app	List them even if you think they match Android
5.4	Same system behind this app as Super Admin?	☐ Yes ☐ Partly ☐ Separate iOS backend ☐ Not sure
5.5	Can you later give us TestFlight access or an IPA file?	☐ TestFlight ☐ IPA ☐ Not sure
5.6	Anything iPhone cannot do that Android can (or extra on iPhone)	Write “none” only after you have compared — do not assume they match

Count unique iPhone screens on their own. Do not reuse the Android number unless you opened iPhone and counted.

Tick one →	Small	Typical	Large
iPhone size	Up to 15 screens	16–40 screens	40+ screens, or pay / KYC / chat / maps

iPhone user journey — tap icon to finishing the main job (write it out, even if it looks like Android).

e.g. open → OTP → home → search → details → pay → receipt

iPhone — tick all Yes for iOS only.

	Pay / wallet / subscriptions — cards, UPI, App Store / StoreKit, points	☐ Yes ☐ No ☐ Not sure
	KYC / camera / ID photos — document capture or liveness	☐ Yes ☐ No ☐ Not sure
	Chat or in-app messages — support or user-to-user	☐ Yes ☐ No ☐ Not sure
	Maps or live location — tracking people or places	☐ Yes ☐ No ☐ Not sure
	Works partly offline / data on phone — some info on aeroplane mode	☐ Yes ☐ No ☐ Not sure
	Notifications / QR / other heavy feature — name it if Yes	☐ Yes ☐ No ☐ Not sure

6. Test setup & logistics

6.1	Where should we test?	☐ Practice/UAT copy (recommended) ☐ Live only ☐ Both
6.2	If this leaked, what would hurt most?	e.g. phones + KYC photos, payments, staff data
6.3	I will attach (tick) / or book a call	☐ Super Admin menu ☐ Android home+menu ☐ iPhone home+menu ☐ Store links ☐ Please call me
6.4	Has this system been security-tested before? When, and were the issues fixed?	e.g. "Yes, March 2025, all fixed" or "Never tested"
6.5	Do you need this for a specific certificate or approval? (e.g. RBI, PCI-DSS, ISO, a client's requirement)	Name it, and the deadline if any — this decides the report format
6.6	Any dates we should avoid? (releases, festive/peak season, freeze periods)	e.g. "no testing 20–31 Dec" or "none"

7. Anything we would get wrong if we skipped it

e.g. two admin portals not one; new payments module next month; iPhone is much simpler.

I confirm this is accurate enough to prepare a price. Access comes later if we proceed.

Name / role	Date
